## PROFILE SUMMARY

AI & Data Science undergraduate with hands-on experience in Python and R for data analysis, exploratory data analysis (EDA), and data visualization using NumPy, Pandas, and Matplotlib. Strong foundation in linear algebra and statistics, currently expanding into machine learning. Passionate about building practical AI-powered applications and leveraging modern AI tools to accelerate software development.

## EDUCATION

**B.Tech in Artificial Intelligence and Data Science**
Arya College of Engineering & IT • August 2025 – Present (2nd Year)

## TECHNICAL SKILLS

**Programming Languages:** Python, R

**Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Scikit-Learn, dplyr, ggplot2

**Data Analysis:** Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis

**Developer Tools:** Git, GitHub, Jupyter Notebook, VS Code

**Mathematics:** Linear Algebra (MIT 18.06), Statistics

**AI Development Tools:** Antigravity, Claude, GPT, Gemini

## PROJECTS

**Netflix Data Analyzer** (GitHub)
- Conducted exploratory data analysis (EDA) on a Netflix content dataset using Python and Jupyter Notebook.
- Analyzed and visualized trends in Indian content availability, surfacing patterns in regional content mix.

***Technologies:*** *Python | Pandas | Matplotlib | Jupyter Notebook*

**U.S. Murders Data Analysis** (GitHub)
- Analyzed U.S. state-level murder rate data in R using the dslabs package and base R plotting functions.
- Built comparative visualizations across all 50 states to identify regional patterns in crime rates.

***Technologies:*** *R | dslabs | Base R Plotting*

**Monthly Temperature Comparison** (GitHub)
- Compared average monthly temperature data across Delhi, Mumbai, and New York using R.
- Generated comparative visualizations to highlight seasonal temperature trends across three distinct climates.

***Technologies:*** *R | Data Visualization*

**Personal AI-Assisted 3D Portfolio** (Live Site)
- Developed a responsive 3D portfolio with Antigravity, leveraging AI-driven development to rapidly prototype and refine an interactive user experience.
- Showcases projects, technical skills, and achievements through an engaging virtual environment, deployed on Vercel.

***Technologies:*** *Antigravity | Vercel*

## CERTIFICATIONS

**Python for Data Science and AI — IBM, via Coursera (Sep 2025)** (Verify Credential)
**Google Cloud Essentials — Google Cloud Skills Boost** (View Badge)
